Dear Admissions Team,

It gives me an innumerable amount of satisfaction to recommend Mr Rahul Katyan for graduate studies at your recognized university. Over a decade of my tutoring experience, I've tutored more than three thousand scholars, coming from varied backgrounds and enjoying a wide diapason of bents, capacities and personality traits. I would place Rahul among the top 2 percentile of all the scholars whom I have tutored. Rahul has been my pupil for 4 times between 2000 and 2004. I've tutored him various subjects during this era, including arrangement (Semester 4), Algorithms II (Semester 5), Compiler Design (Semester 6) and Abstract State Machines (Semester 8). He is a very sincere and a hard working pupil with innumerable tone- drive to excel in his chosen field of studies. He has been harmonious in his academic performance, retaining his class rank in the top 2 percentile throughout his undergraduate program. His performance in subjects similar as Algorithms and Abstract State Machines were exemplary, demonstrating his keen interest in these motifs. His capability to ask the right questions and conduct his own exploration and studies out of the classroom, not only helped grease perfecting conversations in the class but also reflected his eventuality for exploration. Rahul, along with two other scholars and myself, presented a paper in IEEE organized conference, 2004

International Computer Science and Engineering Conference in Malaysia. The paper, named "Cloud Based Software Platform for Big Data Analytics in Smart Grids", was the capstone of a 2-month design that Rahul did, during the summer break of 2003. I observed Rahul taking up responsibilities and efforts to understand the wisdom behind the exploration, for making and recording careful compliances in the laboratory. His originality and capability to make creative opinions helped us complete the paper for the conference during a short span of your time. Rahul is a well-rounded person, with a lot of enthusiasm for sports and adulterous conditioning. He has also shown his artfulness at organizational chops, especially in across-cultural setting. He's been approachable and easy to communicate with.

I concur with his opinions to pursue graduate studies and explosively recommend him for admission at your university.

Unfeignedly,

Director
